The Honorable Kim Reynolds

Office of the Governor
1007 East Grand Avenue
Des Moines, IA 50319

Dear Governor Reynolds,

I am writing to extend my deepest appreciation for your principled veto of House File 639, a decision that reinforces Iowa's commitment to President Donald J. Trump's vision for American energy dominance. Your leadership has preserved Iowa's role as a leader in advancing critical energy infrastructure and supporting our state's agricultural and economic vitality.

By rejecting HF 639, you have protected the development of essential projects, including carbon capture and sequestration, as well as pipelines for crude oil, ammonia, and fertilizers. This aligns with President Trump's agenda to eliminate bureaucratic obstacles, expand domestic energy production, and drive economic growth in rural communities. Your veto ensures Iowa remains a hub for innovation in biofuels and other technologies that empower our farmers and bolster national security.

Your action sends a powerful message that Iowa is dedicated to fostering an environment where American energy solutions can flourish. By standing firm against legislation that would have hindered progress, you have kept Iowa in step with the Trump Administration's bold, America-first energy policies.

Thank you, Governor Reynolds, for your vision and unwavering support for Iowa's farmers, energy producers, and the future of our nation's energy dominance.

Thank you,

Nick Ryan
